

An Afternoon of Talks by 2nd Year Students

Friday, 22 May 2009
MR2, from 14:15-17:15

14:15 Alex Holyoake: *Chute flows of granular materials*

14:30 Daisuke Takagi: *Natural granular flows*

14:45 Knut Drescher: *Dancing Volvox: hydrodynamic bound states of swimming algae*

15:00 Rosie Robison: *The interaction between turbulence and propeller blades*

15:15 Ioanna Vlahou: *Fracturing of rocks by ice*

15:30 Tea

15:45 Hanno Rein: *From dust to planets*

16:00 Julijana Gjorgjieva: *Self-organisation in the developing visual system*

16:15 Richard Wood: *Jet streams in shallow atmospheres*

16:30 Katy Richardson: *Effects of fluctuations in simple nonlinear dynamo models*

16:45 Adrian Barker: *Tidal evolution of hot Jupiters*

17:00 Draga Pihler: *A quasi-one-dimensional model for collapsible channel oscillations*
