GX(i) → U1(i)   GXF(i) GYF(j) ● U3,p,θ (i,j)   GX(i+1) → U1(i+1)

GY(j) ↑ U2(j)
○ Wall-normal velocity defined at G points

● All other variables defined at GF points

////// Wall locations

By definition, the fractional grid is halfway between neighboring base grid points, i.e.

$$GYF_j = \frac{GY_{j+1} + GY_j}{2}$$
