

2030 vision

for the Cambridge sub-region

Culture, leisure and sport

Tuesday 16 October at 6.30 pm

Workshop to be held at the Centre for Mathematical Sciences,
Wilberforce Road, Cambridge CB3 0WA

How can we encourage as many people as possible to be actively engaged?

2030 Vision is an ambitious two-year project to look at what we want Cambridge and its surrounding area to be like in 2030 and to ask what we need to put in place now to achieve that. The aim is to develop a vision that local authorities and others can take into account in their statutory processes.

Over the next two years 10 topics will be considered – the next is on Culture, leisure and sport in the Cambridge sub-region:

Come and give your views in a discussion led by **Andy Salmon** of Anglia Ruskin University, with introductory talks by

- **Donna Lynas** (Wysing Arts Centre): Culture and leisure
- **Martin Beaver** (Anglia Ruskin University): Leisure and sport

See cambridgeppf.org/vision/8/ for background

Please urgently email planning@cambridgeppf.org to confirm that you are able to come. Alternatively telephone Nigel Bell 01223 243830 x 205.

Soft drinks and nibbles will be provided. A limited amount of parking is available on site; please let us know if you need a space or have any other special requirements.

Access details are on <http://www.cms.cam.ac.uk/visiting>

The output for each 2030 Vision topic will be a very brief summary paper, together with more detailed backup material to be held on CambridgePPF's web site. At the end of the two years, when all 10 topics have been covered, we will pull everything together. The project will consider the whole sub-region defined by the Cambridge travel-to-work area – a radius of about 25 miles.

The workshops are being funded by BAA Stansted and are organised by a group with no political affiliations:
